

# THE GLEICHEN CALL

VOLUME XXXIII NO 21

GLEICHEN, ALBERTA, WEDNESDAY AUGUST 7, 1940

SUBSCRIPTION \$2.00 PER YEAR

## RED CROSS MAKE SPLENDID SUM- MER RUMAGE SALE

The Red Cross sale held Saturday night on main street was well attended and over \$400 was realized. H. Beach acted as auctioneer and his good form sold everything he had for sale.

It was a rummage sale and it was surprising the amount of staff people were able to find things for their homes. So much stuff was there offered for sale that it took big truck to carry it to the sale site.

There was everything imaginable donated, such as sewing machines, iron, moses, neckties, rubbers, overalls, pancake flour, bacon, dishes, glassware, coats, chairs, garden tools and many other articles found around a well conducted house.

Immediately following the sale the raffling of a volume of books donated by Mrs. McConnell took place. T. H. Beach held the lucky ticket. The books realized over \$20.00.

## AIM OF NATIONAL REGISTRATION

On August 19, 20, and 21 a great army of Canadian people—all those male or female, over the age of 16—will move out to points of registration and fill in the cards containing a number of questions.

Why is this registration taking place? This country is at war. It must put forth the utmost possible effort to accomplish its purpose. That purpose is the defence of the nation.

In order to do this it must marshal the full forces of the nation—all the human, moral, material and spiritual forces of Canada.

There can be no lacking. We need more planes, tanks, ammunition. To produce them we need more men, women, materials, money. The nation must produce more, spend less, and do, be frank about it—pay more taxes.

Then it is necessary that our young men should be trained for home defence. This country is at war. It must put forth the utmost possible effort to accomplish its purpose. That purpose is the defence of the nation.

Yes, we are at war. Registration means simply organization for greater effort for victory. Register early. To answer the questions takes only a few minutes but the answers are regarded to answer. Read the questions in this paper and know the answers you have to make before you go to register. Where so many must give their all you will not hesitate in doing your part.

## OTTAWA LETTER

BY DR. F. W. GERSHAW

The session just closing has been a war session and assembled at a moment of intense of the war. A review of the record shows how a peace loving nation of eleven million has been organized to fight for the preservation of freedom and democracy.

After the untimely death of Mr. Rogers, the now minister of defence, Colonel Blakeney, was given wide powers.

Minister for defence for air, Major Powers, and a minister for the navy, Honorable Angus McDonald, were appointed. All of these men have great service in the government. A billion dollars worth of supplies including everything from boots to battle ships and from hats to service flying training schools were needed. Mr. C. D. Howe with a host of volunteer executives, have been in charge of this work since it was taken over. They have been attempted and more satisfactorily carried out.

The Act respecting Treachery was passed with general approval by all parties to the government. It is designed to give assistance to the military, air and naval operations of the country shall on conviction suffer death. If the action is not quite so serious the penalty may be life imprisonment or a term of years.

There are 102 sections in the Unemployment Insurance Act. About 4,000,000 people in Canada will be affected by this Act. The government pays one-fifth of the cost and also the cost of administration. The employer pays from 15c to 25c per week depending on the wages paid. The employee pays from 10c to 35c also depending on the wages paid.

## News Items of Local Interest

The local Boys Band will unite with the Strathmore band to play and for the sports held at Three Hills this afternoon.

Mrs. J. A. Ramsey left last week for Vancouver for a holiday. She is making the trip by auto with her son Levett of Calgary.

Jack Staback, his sister Lois, Teddy Egles and Ellen Jones arrived in town Monday afternoon from Calgary to spend a few days night seeing the city and a good time generally.

A drive through the district shows that there will be some fine crops harvested this year. It is true some fields have been damaged by hail but others have escaped so far.

Frank Woods and Henry Kraymer of Duesch spent Sunday in town visiting the farmers' parents. Mr. and Mrs. Elz Woods. Frank has enlisted with the home defence corps.

Mayer Menard paid a visit to Calgary Tuesday. Believe it or not that is news for it is the first time he has been able to visit on a week day for many many months. The his absence affairs in town went on as before.

All owners of combines and threshing machines are warned to procure necessary licenses before the season. The Police are instructed to prosecute any infractions found.

Bob Rydell has received word that he passed his high school examinations. This boy deserves much credit for he is now through high school at the very age of 17. This is a fact that every few pupils ever do at that age.

Increase of one cent per bushel of wheat is unexampled and ridiculous," the Homeowners' League of British Columbia has decided. Coast lakers claim the price advance is made necessary by the new flour processing tax of 15 cents per bushel of wheat.

Reduction in ratio for grain storage from 1-30 of a cent a bushel to 1-40 of a cent per day has been announced by E. B. Ramsey, chief of the board of grain commissioners for Canada, pending on the wages he receives.

When a person who is unemployed is otherwise eligible for benefits, the amounts received will vary from \$4.08 to \$12.24 for a single person and from \$14.80 to \$14.40 for a married person with a dependent. This bill will not in any way cur unemployment but many countries have had successful experience with it.

The Alberta Bank Bill was discussed in long lengthy sessions. Mr. Low from Edmonton, gave much credit to Mr. Blair for appointing the members for their interest and fairness in the long discussions. The deciding factor in the decision to give the bill to the legislature was the evidence of the law officers of the Crown.

These men who see specialists in such laws have the opinion that this Parliament had not the power to grant the request. It would mean that the government, with the approval of the government and the B.N.A. Act does not permit the adding to or taking away from these powers. Any bank must be liable to be used and a province cannot be used except by its own permission. Again a director of the committee seemed to be apologetic but the evidence seemed to be convincing and the decision seemed to be with general approval by those who were privileged to hear it.

Oil cans are not food cans and should not be used for any food product.

Members have felt the strain of the long session and cabinet ministers have made sacrifices only less than those in the active forces.

This applies to line elevators and terminals. It is reported probable, however, that it is the rate to be allowed to farmers for storing their own wheat since government granaries have said farmers would be allowed the same rate as the elevator companies.

The C. P. R. station agent wishes to remind the parents of the danger involved in allowing their children to play on the station platform and rail yard tracks, and urge their cooperation in dissuading them from this practice.

Launching of a tomb fund by the Legion of Frontiersmen is announced. The first drive was commenced August 1 in an effort to raise \$100,000 to purchase a number of the Blingbrook type for use against the enemy. The money must be raised in 60 days, and 4,000 Legionnaires are determined to get it by means of tag days, solicitations and voluntary contributions.

Adam Garven, 75, a resident of Everette Home left Friday morning. He was born in Ontario and was a trapper, which occupation he carried on for 40 years. He came to Glendora from Fort Smith, N.W.T. about two years ago. Funeral services were held Saturday afternoon at the residence of the Major J. J. Suther with other Salvation Army officials assisting after which interment was made in Everette cemetery.

## FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

St. Stewart will open a general store next Saturday at the Arrowood consolidated school, having acquired the former school building for the purpose. The new business will be known as the Arrowood Store and Mr. Brown. Bob Staback has been employed in various stores here since he came for a couple of years he spent in Lethbridge.

W. M. Lyle left Sunday night on a business trip to Missouri. Mr. and Mrs. F. E. Pohat have returned from an extensive trip into North Dakota. They report fine crop prospects everywhere.

Oil cans considered DANGEROUS FOR FOOD.

It has been brought to the attention of the Dominion department of agriculture that many people are making use of oil cans for the canning of foods.

The use of oil cans for food is considered a very dangerous practice since they are made of Tensile plate, a plating which is almost wholly lead, and small amounts of lead are poisonous.

Cans made expressly for foods are entirely different and can be bought at small prices from hardware stores and mail order houses. Years of research have gone into the manufacture of cans for canning food, with the result that the inside plate is lead free. This is done to make it impossible for foods to become contaminated with lead, and no cans should be used for fruits, vegetables, meats or fish other than those made of food cans.

Oil cans are not food cans and should not be used for any food product.

## VET. ORGANIZATION RECEIVE HOME GUARD INSIGNA

Secy. Phytian of the Legion states "In hands for the home defence squad has arrived and the veterans hope to start drilling shortly. Judging by the looks of the veterans they would get an unshy delight in filling in any little volunteer. Make no mistake about it the veterans would not hesitate to attack any number of traitors regardless of the consequences. To realize this just talk to them about rumors heard and see their faces harden and eyes glint, three's hoping they will never have to be called into action and that all who think this country is good enough to live in is worth being loyal to regardless of where they were born or what country their fore fathers first saw the light of day.

## COMING EVENTS

Aug. 11—Dance at Meadowbrook Community Hall. Mrs. Trainor's orchestra.

## THE WORLD OF WHEAT

BY H. G. L. STRANGE  
Director, Research Department  
Searle Grain Company, Limited

Dispatches from Ottawa inform us that owing to the lack of elevator space farmers will be required to store grain for a time at least on their own farms. This means that elevator companies and farmers, too, will tend to "plug" or fill up their bins to the limit.

Almost every year, particularly since combining started, some farmers and some elevator companies have suffered severe losses because stored grain had become bin-burnt, which lowered the grade to rejected and sometimes to no grade at all; this bin-burnt being brought about because the grain was cut and threshed before it was thoroughly ripe, or because the grain contained unspiced weed seeds.

The grain in plugged bins is difficult to examine or to turn, and so it is more important than ever that grain for storage this year should be perfectly dry and free from weed seeds. It is evident, therefore, that farmers, particularly those who combine, should this year delay cutting their crops until the grain is thoroughly ripe. Special efforts, too, should be made to see that the screens of combines and of threshing machines are kept in proper working order so that weed seeds, which lower grade and take up valuable space, will be removed from the grain.

Mrs. A. Garath who is living in westbury, B. C. spent a few hours in town Monday visiting her many former friends. It will be remembered her husband, Adolf was a clerk in the Shopton Store here until about three years ago when they moved to the coast province.

Many are enjoying its greatest year to date, and last month was the greatest July from the tourist point of view. It is believed that the high commissioning of American visitors, many of them having been deterred from coming owing to fears of border regulations being made more stringent.

Southern Alberta is said to be experiencing a coal boom, as result of contracts from Ontario being placed in this province. Many unemployed miners have already found employment, and for the first time, Southern Alberta steam coal is being shipped on regular contracts to two railway stations east of the lakehead.

Under the revised tax schedule in Canada's wartime budget, tax stipends will reimburse an added \$800,000 to the government this year.

The following appeared in a London paper: "What do I do, when I hear a gun explosion, air-raid warnings? I keep a cool head. I take cover. I gather my family with gas masks and run quietly to my shelter or refuge room. I do not try to have a look. I do not rush about alarming people.

## FRIENDS FOR LIFE

Christopher Lunt, one of the younger children evacuated from the United Kingdom, was in a happy mood when he reached Vancouver after travelling by Canadian Pacific steamship across the Atlantic and by Canadian Pacific train across Canada. He is shown here saving good cards a long time. Christopher Lunt, who took good cards to his new found pal, Porter George Livingston, had a grand time on the journey and is now safe from German raiders. He will live with friends on the West Coast.

IT HAS EVERYTHING IT DOES EVERYTHING IT'S A BEAUTY

## OLIVER STANDARD

Here's Efficient, Modern Power For Fast, Modern Harvesting

Roll easily and quickly through your harvest work with an Oliver 70 as it drives and pulls a footed combine, a tractor loader or a 2-row picker. Make just one round in the field and you'll know the 70 has everything, does everything and is a beauty to operate as well as to see. You'll know the why of its easy-handling and fast working speed that get jobs done in a hurry at lowest cost.

Smooth, lively 6-cylinder 7070 power is ideal for operating combine or similar power take-off jobs, and for belt work such as driving a shaft thresh. The steady overlapping power of six cylinders means more effective driving power for such work. Power take-off and belt pulley speeds direct and direct two engine speeds, and are independent of frame. Finger-tip control of all operations from the combine to the tractor seat, and automotive steering mean easier driving, time-saving operation. The Oliver Variable Speed Governor Control enables you to use only the fuel needed for the work.

Oliver built the 7070 with two fuel types for maximum fuel economy—the 7070 HC with high compression engine for gasoline, and the 7070 KB with engine designed for kerosene or distillate. Pick your fuel and your 7070 Get maximum low-cost tractor power. See us today see a demonstration.

### Preparing For Peace

The announcement recently by Dr. J. S. Thomson, president of the University of Saskatchewan to a convention of rural municipal men and women that, in his opinion, great changes which may affect the whole trend of our economic, social and political life are impending when the war is brought to a conclusion, gives rise to the belief that the rank and file of the people of this country might well give serious thought to the war's aftermath and the problems it is likely to bring in its train and how best they may be solved in the interests of all.

There has been some disposition on the part of some leaders to push aside the matter of consideration of post war problems, largely on the ground that the time and attention devoted to such questions might detract somewhat from the effort which must be put into the task in hand, that of bringing the war to an early and successful conclusion. This viewpoint is largely based on the assumption that it is difficult, if not impossible to give attention to a big and important problem while another equally great, if not of greater importance for the time being, is being dealt with. "Sufficient unto the day is evil thereof" is apparently behind the premise of such thinkers and speakers.

It would be a very fine thing, of course, if it were possible for the individual, the family, the governments, business and other organized entities to deal with one problem at a time and to devote all their energies before tackling another one. But the complexity of our civilization and the great diversity of our affairs prevents the consummation of such an ideal. In practical life, the individual and the organization, no matter of what type, has to keep many things in mind at the same time and to devote attention, more or less piecemeal, to many problems. If one had to wait for the complete solution of one problem before broaching another, little or nothing would be accomplished, because no sooner had one question been apparently satisfactorily settled than a new facet of the same problem arises to demand more attention. With affairs always in a state flux this mist necessarily be so.

#### The Wrong Direction

There, of course, must be agreement with the opinion, sometimes publicly expressed, that the winning of the war is the first and paramount duty of the people of this country, that people have no say in the settlement of post war questions. This is granted, but it does not, and should not, prevent some consideration being given of what is to follow the conflict, because it can be assumed that with a victory for the Allied armistice people themselves will have to decide the course of their future destiny. If they do not, and leave it to somebody else to decide for them, they are forging the first links of a dictator's chain which may enmesh them and hold them in a bondage that will hard to escape. In that way lies the road to totalitarianism.

And if these post war problems are to be settled satisfactorily and in the interests of the country as a whole it is essential that the opinions and decisions are to be made are backed by a large body of crystallized public viewpoints and that cannot be attained overnight. A hasty opinion is apt to be a wrong opinion and it is better to have to see the going to be too important to be dealt with on snap judgment. If our democracy is to be a success.

If the future of this country and the happiness of her peoples are to be assured it is essential that these problems be approached in a spirit of calm rationalism. We must not be ruled by the forces of mass hysteria, but our minds must be imbued with patience, reasonableness and humanitarianism if we are to secure an enduring democracy which, after all, should be our prime objective.

If we are to avoid dictatorship, it is essential that these problems be thought out in advance, as far as is feasible, so that when the time comes for practical application of our views and the principle behind them, there will be a reasonable amount of unanimity and we can then face the future with strength in the knowledge that we are building a well-founded democracy, one that will not be dispirited at the first breath of organized disturbance or that will be easily overthrown by confusion and hysteria.

#### The Local Influence

While dictatorship operates from the top downward, democracy is built from underneath, the people themselves being the foundation of the entire structure. If the foundation is insecure, the structure will be weak, easily assailed and perhaps wrecked. Hence the importance of sound, reasonable popular opinion.

If the people themselves adopt a rational outlook towards their own minor local problems, such as confront them daily in the operation of their own municipalities, schools and so forth, they will be able to tackle the larger national and international issues in the spirit inspired by confidence and certainty of rectitude. In this manner, they will prepare themselves for the questions of great magnitude which will be called upon to settle when the guns are silent.

Even as the individual, no matter how humble, has a part to play in the winning of the war, so has he or she, a duty to perform in winning the peace to follow the war. There is as much truth in the dictum: "I will prepare for peace" as there is in the injunction to prepare for war during the time of peace.

Careful records of temperature, rainfall, sunshine, and other meteorological conditions are kept on all the Dominion Experimental Farms. These records supply valuable information regarding the effect of climatic conditions on crop growth in the various districts throughout Canada.

The Titan beetle of Brazil grows as large as a human hand; specimens have never been captured alive.

### Never Has Water Shortage

Ever-Flowing Well Has Supplied Ontario Farm For 80 Years

While other farmers in the district around Bridget, Ont., have suffered the inconvenience and expense of the winter of hauling water for their stock a considerable distance, their ever-flowing water well, which spouts a stream of water every few seconds, has solved the water shortage problem on an 100-acre pasture farm owned by William and Alvin Blacklock.

One of the few of its type in existence in the Blacklock well is operated by its own natural gas supply and it has been in operation for more than 30 years with never a lack of water.

The well is 145 feet deep to the rock and the water stands within 20 feet of the top in the casing. The gas pressure is providing by a simple device. A three-eighths inch water pipe with a funnel at the end is set a depth of 75 feet into the casing, stopping the natural gas flow, which is then forced through the water pipe. The result is that the escaping gas forces the water above the surface.

The Blacklock brothers pasture 40 head of stock on the property each year, and with a water supply of 70 barrels a day, which the gas pressure forces to the surface, they have no worry about a scarcity of water for their livestock like other farmers in the Bridget district.

In the Moore township there are many natural gas wells that farmers use as gas-light flares in the winter. The Blacklocks, however, use their water well to natural gas pressure to force water to the surface.

The pasture farm is located on concession nine, Moore township, and the flow of natural gas was used for lighting and heating purposes in the home.

### Would Bet On British

Kansas Paper Confident Naval Tradition Would Win In Contrast

What a thrilling story of the freeing of the British prisoners from the German ransom ship! Quick maneuvering, grappling iron, and boarding party—all the features that used to fascinate us in the old adventure stories of the Spanish Main.

The Germans scored their big naval triumph when the submarine got to Stapa Island, the German Royal Oak, that the British came back with the spectacular defeat of the Graf Spee by three small cruisers, and now by the rescue of the prisoners on the Altmärk in a Norwegian fjord.

In any contrast involving the great British naval tradition our money would go to the line of Drake and Nelson—Kansas City Star.

### Private For Sailors

Royal Marines Can Win Wives To Meet Them In Port

A naval rating or Royal Marine whose ship arrives in port for only a few days may find a telegram from his wife asking her to join him at once. It has been officially announced. Wives on surrendering the telegrams provided by the government for the rating's use at railway booking offices may obtain tickets at reduced rates. Telegrams must not give the ship's name!

### Needed More Time

Uncle Abner had been very much occupied all by himself in a corner of his cabin near the fireplace. He had been working industriously with a stub of a pencil and a piece of paper. Suddenly he looked up, a joyful expression on his wrinkled face.

"Doggone!" he shouted, "I ain't learned to write!"

"I did, know," Uncle Abner replied. "I ain't learned to read yet."

Soldier Has His Troubles  
Smallest feat in the British Army are those of Herbert Norbury, 30, Royal Artillery gunner, who takes 1/2 lb. of smaller Army food, which could get a wife, and he pads the toes with cotton wool.

Japan taxes her native radio listeners 25 cents a month. 2503

### Extraordinary Bequest

Money For Australians Left By A Strange Will

Fifty-eight years ago, the public of New South Wales was startled by the extraordinary will of Mr. Peter Mitchell, a wealthy pastoralist, who left his large fortune to the winners of competitions for physically and mentally outstanding men and women of Australia.

So far, none of the money accrued from that fortune of £150,000 has been used for the competitions, the reason being that the will provided that an annuity of £5,000 a year must be paid to Mr. Mitchell's widow, who has since remarried.

Although Mr. Mitchell's basic idea was sound and commendable, there were many strange clauses in his will. He stipulated, for example, that the winners of the competitions must be not only perfect physical specimens but must also be examined in their knowledge of literature.

In particular, they had to be acquainted with the works of Carlyle, Cervantes, George Eliot, Scott, Stevenson, Thackeray, George Russell, and Whitman was an avid reader and the writers named in his will were presumably his favorite authors. It is extremely doubtful, however, if modern candidates for the prizes granted under the terms of his will would, besides their robust health and physical stature, possess a very limited knowledge of the authors named, much less the books they read.

Other clauses in the will provided that the competition winners should be under 30 years of age and unmarried. They had to be British subjects resident in Australia, not to have hereditary taints, they had to be good riders, shooters and general sports and they had to be bright and cheerful.

They were required to have a good knowledge and understanding of the British Empire and to have some knowledge of practical housekeeping, nursing, and the training, care and rearing to perfect health and strength of young children—Australian Press Union.

### To All Grocers And Housewives

That wonderful food "Grape-Nuts" has just announced a reduction in price that will make a package cost less than ever in its long history. In fact you can put an order before the hungry family at less than one cent a serving—and it's all ready cooked.

There have been literally dozens of "Grape-Nuts" imitators on the market over the years but the old reliable was no good it stayed and the others faded away. Being very rich in food energy—tasty and satisfying to young and old—"Grape-Nuts" will be more popular than ever at this new low price.

Ask your grocer for "Grape-Nuts" and use it every day—you won't get tired of the delicious flavor and it will get a breakfast dish that satisfies both your taste and your appetite.

Approximately 50 per cent. of the wear on an automobile tire occurs in the four warmest months.

### Travelled Long Distance

Irishman From Alaska Marched In St. Patrick's Parade At New Jersey

A brawny Alaskan sardough, who insisted he had travelled 6,822 miles because he was "lonesome for a crowd of Irishmen," marched with 99,999 other sons of Erin in St. Patrick's Day parade at Newark, N.J.

Marching with the O'Hara Association was Peter A. Brady, a County Cavan man who struck out for the gold fields 32 years ago. Brady returned to Newark at the insistence of an old acquaintance, Frank O'Hara, who has been corresponding with the gold miner since he left Newark in 1908.

"I'm sad for the lack of my own people," Brady wrote O'Hara from his camp on Jack Wade Creek, 200 miles north of Fairbanks, Alaska. "St. Patrick's night will indeed be a sad time for me."

O'Hara lost no time inviting Brady to march as Marshal of the O'Hara Association unit, and Brady lost no time getting to Newark.

He balked at parade regulations which require silk hats, but finally agreed to wear one.

"I'll do it," he said. "But mind, I won't like it!"

### An Interesting Collection

Queen Mary Has Photos Of Royal Family's War Activities

An intimate friend of Queen Mary is telling how Her Majesty has lately received a collection that she began during the last war. This consists of photographs of the activities of various members of the royal family connected with the war, and it is already assuming rather large proportions.

The collection that Her Majesty made during the last war is now of considerable interest and will be of value to the historian of the future. Some of the pictures are not to be found elsewhere, particularly in this case with those showing the late King with his troops on the Western Front.

### Hard Pressed For Labor

German Units For Volunteer Workers in Armament Plants

The German high command has pressed for labor despite their hopes of using Polish and Czech labor in their vital plants—sent out a call for volunteer workers in the manufacturing of torpedoes, guns and other naval armaments.

The Nazis said that some of the volunteers would also be trained in the use of naval communications. At the same time in Berlin—Germany again displayed her need for further manpower when it was made known that the Nazi military forces were accepting recruits as young as 17 years old.

### Wanted—Effort

Robbers laboriously ripped through a steel and concrete safe in the office of the Universal Textile company at Providence, R.I. Leonard White, the treasurer, laughed when informed by police. There was no money in the safe. It had not been locked in 10 years.

Combs six to seven feet high are built by the giant bees of India.

### Hollywood Zoo Closed

Management Gives Up, Struggle After Heavy Losses

Zoo Park at Hollywood, where cameras ground on the earliest wild animal pictures, is closed to the public. "We just couldn't feed the animals any longer," explained Secretary J. H. Vatcher.

Behind his remark is a human interest story and a tale of two years of struggle to keep interest alive. Damaged heavily in the 1938 flood, the Zoo never quite recovered. School children poured in pennies and nickels at benefits, but it wasn't enough. A severe blow was the death several months ago of Anna May, veteran film elephant and one of the chief attractions.

The human interest story is that of Olga Celeste, who came west in 1910, with Col. W. B. Selig, Zoo founder, she remained to become its chief trainer and one of the few women who will perform with the ever famous hippodrome.

On one in recent weeks, she watched the population dwindle, as animals after animals were sold. Finally it came to the "cows." "I mortgaged my furniture," she says. "I borrowed from friends. I managed to get enough money to buy them myself. I didn't want anyone else to have them." She obtained five leopards and three lions, and hopes to build up a circus act.

### Marble Mantels For Sale

New York House Wrecker Took Thirty From Vanderbilt House

At East Fifty-second street, where the Columbia Broadcasting System is building an annex, stood the W. K. Vanderbilt house. Mr. Johnson found 30 marble mantels in this place, says the New York Times. He thinks they cost Mr. Vanderbilt from \$3,000 to \$5,000 each. Mr. Johnson will sell them for \$300 to \$250 each.

He said, "When I tell you old houses do not die, I mean some of these marbles will go back to Fifth Avenue and to Park and Madison even into apartment houses. Some will go to Texas and some to California and to big estates in the country."

Some pieces in Mr. Johnson's shop came from houses wrecked 60 years ago. They were preserved by C. H. Southard, who was one of the first house wreckers in New York. Mr. Johnson bought the business from the Southard heirs eight years ago.

Pressure is more than 90 pounds to the square inch at 230 feet under water.

## BEE HIVE SYRUP

## Loss of Freedom

The Price The U.S. is Paying For Keeping Out Of The War

The Nazis, in their counter-blockade of England, have already downed some 600 Scandinavian ships. They are nothing of Dutch and other neutral losses, and they have sunk well over 100 neutral ships. The only reason we are warning, the only reason we are not having our (United States) ships sunk by German submarines and mines is that we have forbidden them to sail combat waters.

It is curious that we should say these things are so, and yet we are so sure, when they see our ships off the high seas and cripple our trade. It is inconceivable for us to take so calmly the fact that Germany has already chased us of a very important part of the ocean, and then at the same time to rage so furiously at anything so comparatively harmless as search of mails for contraband.

A lot of us still think we went into the World War quite under our own steam and by our own volition—to fight as we used to fight in the past, for our right to sail the seven seas, as well as to make "the world safe for democracy"—a good cause to fight for, why didn't they try to finish the job after it was over—and the battleground happened to be France.

This time we have preferred to automatically give up our rights to fight as we used to fight in the past, for our right to sail the seven seas, as well as to make "the world safe for democracy"—a good cause to fight for, why didn't they try to finish the job after it was over—and the battleground happened to be France.

In Spite of Maps The dignity and restraint of Baron Mannerheim's message! Its utter freedom from bitterness and its many courtesy! It is just the sort of thing we have come to expect from Finland. Out of a grotesque war that never should have been fought, Finland it is that has grown in stature, regardless of what the map-drawers have to say about it.—Ottawa Journal.

Ships of the world launched nearly 3,000,000 tons of new merchant vessels in 1935.

Sixty cities in the world have populations of more than 1,000,000 each.

## No Fear of Detection

New Radio Device Permits British Broadcasts During Enemy Raids

A new secret British radio invention, more complicated, perhaps, in its scientific make-up than the recent electrical device that men enable ships to sail unmolested over German mine fields, has given the British Broadcasting Corporation in the unique position of being able to continue its news and other programs without interruption by Nazi raiders.

In Germany and, for that matter, France up to a short time ago the approach of hostile aircraft has necessitated closing down the transmitting station in case its radio "beams" should give the airmen a guide to their destination—much the same way as ships are steered on fog by radio beams sent out from shore stations.

Now the British claim to have discovered a means of sending out radio programs without giving a listening airmen any directional clue regarding its source, and the discovery is expected to go down in history as one of the outstanding radio achievements of the war.

During the last war, the large of necessity has given the inventor a tremendous flip. New devices and methods of military and naval communication coming to the front daily. As one B.B.C. official put it:

"During the last war, for has been our only war casualty." Television programs, in which the British held they were leading the world, were cancelled at the outbreak of the war, and they are not likely to be revived, except possibly by means of the new device.

The tall white building at Langham Place that provided luxurious quarters for radio stars in the headquarters of British Broadcasting, evacuated at the outbreak of the war when the program staff and others were sent in automobiles to their "war stations." It was expected to stand gloomy and empty, but to-day it is filled with hundreds of experts in news and foreign languages, many of whom are engaged in what is known as "monitoring service."

That is one of the new words the war has added to the British vocabulary. Now the term is applied generally to one of the most valuable British war time occupations—keeping check on the enemy. It is saying in his broadcasts to all parts of the world.

## Nazi Airmen Lack Punch

Not Scrupulous As In Last War States Official Ottawa

German airmen seem to lack the punch they had in the First Great War in the opinion of Air Vice-Marshal Sir R. McKean, C.B.E., of the Royal Air Force, who has taken up his duties at Ottawa as chief liaison officer for the United Kingdom air mission in Canada.

The British officer who succeeds Air Chief Sir Robert Brooke-Popham, now returning to England to assume an important post, was enthusiastic about the Royal Air Force raid on the fortified German island of Rye.

At the same time, he was at a loss to understand why German fighter aircraft failed to offer more opposition. He could only conclude they had a healthy respect for the fear of British bombers and preferred to stay out of range.

"In the last war the Germans were real scrappers," he said. "They were usually ready for a fight. Now they seem to act differently. Of course, it is a very fortunate for us." It was generally accepted that Germany still had more warplanes than the Allies.

"Our personnel, however," he said, "the men who actually do the flying and fighting, are definitely superior to theirs, and as long as we have the spirit that our fellows have, we have nothing to fear."

## Time Will Show

That Finland's Fight For Political Liberty Is Not Lost

Conservation over reports that Finland has lost its right will be tempered in Christian nations by the history of Christianity itself. The early champions of this spiritual liberty, no less than defenders of political liberty, contended against powers of darkness as awesome in their time as to some of us to-day. But though the early Christians lost their human lives without—as it seemed at the moment—winning their cause, we of to-day know that they did not lose their battle—Christian Science Monitor.

King Louis XIV. of France spent \$100,000,000 to build the magnificent palace at Versailles. 2533

## Caribou Come South

Have Been Invading Parts Of Northern Manitoba And Saskatchewan

Unusually large migration of barren ground caribou are reported by the residents of the north. At Nelson House, Manitoba, a remote trading post about 400 miles north of Winnipeg, the caribou came farther south this year, with the result that the Indians secured an ample supply of meat and are better off than they have been for some years. The Indians, who depend on the fur resources of the country for a livelihood, also report a better than usual fur catch with the price remaining fair.

The barren ground caribou, the most numerous of all caribou, range in summer over the barren lands of the Northwest Territories, and migrate south for the winter. These animals are now rare or missing from much of their former range along the Arctic coast. In some cases this shifting of range is caused by northern development and in others by the destruction of winter forage of lichen by fire. Until a few years ago it was impossible to get a very accurate idea of the actual range or numbers of the caribou as they wandered over wide areas, but with the large number of permanent white residents in the North and airplanes passing over much of the region in summer and winter it is possible to make fairly dependable estimates, which place the number of barren ground caribou at about three million.

According to the past few years more caribou than usual have come into parts of northern Manitoba and Saskatchewan in winter, and quite recently barren ground caribou have crossed the Slave River into the Wood Buffalo Park and still farther south into the Northwest Territories. Where the species was never known before. These caribou travel in great numbers, and in the winter of 1935 when a herd estimated at 50,000 appeared in the Churchill district.

## Long Transmission Line

Electric Power From Melting Snow Utilized In Sweden

Electric power from melting snow is to be utilized by Sweden to increase her power supply. Recently Sweden set in motion one of the world's longest electrical transmission systems. The Southern, Northern and Central Swedish electric power works were recently linked together at Nasajo.

Sweden delivers substantial supplies of electricity to Denmark by submarine cables across the Sound. Electric power generated by the large plants in the Swedish archipelago regions can now be transmitted as far south as Copenhagen.

The total length of the line from the most northern of the power stations, the Parjunt plant in Lapland, to the Danish capital is about 1,000 miles.

The Swedish Board of Waterfalls are busy erecting three new plants, two in Northern Sweden and one near Gothenburg, totalling 245,000 kilowatts.

## Loss From Weeds

The loss to Canadian farmers by weeds is practically impossible to estimate correctly, but the amount must approximate every year to more than 70 million dollars. To learn the most effective and least expensive methods of weed eradication, many experiments are in progress, supervised by the Field Husbandry Division of the Dominion Experimental Farm Service.

## Efficient Guards

Canaries are used to guard a tank containing deadly heavy carbon gas. These birds are extremely sensitive to foul air and give warning promptly if any of the gas escapes.

Twelve hours and seven minutes make a day at the equator. This is the time which elapses between sunrise and sunset.

## RUDYARD KIPLING'S HOME LEFT TO THE NATION

After Rudyard Kipling spent so many years of his life at the beginning of the twentieth century, stands in 300 acres of beautiful gardens and grounds. It has been left to the Nation and will be preserved by the National Trust.

## One In Every Ten

Is Toll Finnish Army Paid During War With Russia

From the beginning of the far northern war, Finnish army conscripts never admitted the loss of a single Finnish soldier. This was part of Field Marshal Mannerheim's "super-secretive" strategy. The question as to the number of Finnish casualties in an army of approximately 300,000 men, now can be answered authoritatively for the first time.

Within the narrow margin of a few hundred, more or less, in larger items, the following figures are those which are accepted by Finnish authorities:

Total casualties of all kinds (dead, missing and wounded)—slightly over 56,000 men and 2,500 officers, or 38,000 in all.

Killed, 15,700; missing, 1,500; gravely wounded, 12,500. Total of dead and seriously disabled—20,700. (Swedish volunteers, infantry: One officer and one private, killed in action.)

In view of the fierce fighting and of Russia's huge superiority it is considered remarkable that the Finnish army's grand total of casualties should be less than 60,000 men and that only half of these were either killed or permanently incapacitated.

Even so, a figure of 20,700 killed or incapacitated places one out of every 10 Finnish soldiers on the "knockout" list. For a small army like Finland's, such losses were grave indeed.

## An Ace Of Land

Value Depends On Where It Happens To Be Located

The Peterborough Examiner says: An acre of land varies in value depending on where it is located. In the cities of Ontario there are 70,222 acres within the various boundaries, and the total assessment is \$878,476,392, and that in turn gives an average value of \$9,343.05 for the acre of land which happens to be within the city limit. The figure is undoubtedly driven up by the extremely high value of business property in the congested areas of some of our larger cities.

When your acre of land happens to be situated in a town the price of it comes down. Quite decidedly so. It runs from \$408 to \$289, and the average for the province is \$488.

When the acre happens to find itself in villages the assessed value takes another drop and brings the village average to \$204 per acre. And then when the acre finds itself located in the country, where nearly all of our acres are located, the value goes down very rapidly and finds resting place at \$21.

In Toronto there are 501 persons for each assessed acre of ground, and although it is difficult to explain the official records make it read that way. Ottawa has almost the same density of population with 49.8 persons per acre. But the most outstanding feature is the difference in the price of an acre of land—from \$21 in counties and districts to \$9,343.05 in cities.

## Efficient Guards

Canaries are used to guard a tank containing deadly heavy carbon gas. These birds are extremely sensitive to foul air and give warning promptly if any of the gas escapes.

Must Be Used Again

Stanza Dropped From National Anthem Would Fit Conditions To-Day

Since its adoption as the Canadian National Anthem the words have undergone changes. It has been pruned a bit, altered here and there. One whole verse was dropped, about the time optimism and self-satisfaction were permanent Brotherhood of Man was in process of formation. That stanza might now be taken out of retirement, dusted off, and again put in circulation for it voices the sentiment of most and probably of all who whole-heartedly sing "God Save the King". The deleted verse fits to-day's conditions as created by the architect and his sycophants. A member how it runs? "Confound their politics. Frustrate their knavish tricks." Who could be more put with a "blistering" possible, or long, wearing war incited by Hitler impending?

"God Save the King" is more than a plea for the safety of the monarch who is Canada's King. His safety and his victories are our own. United his people can face with confidence any common foe. Any part east, west, north or south, may have its individual song suited to the environment, but above all these, in power and volume, the strains of the National Anthem will rise while the British Commonwealth of Nations stands as it always will for justice and honor without and without its confines—Ottawa Journal.

## GEMS OF THOUGHT

EDUCATION

Educator has for his object the formation of character.—Herbert Spencer.

Instruction increases inborn worth, and right discipline strengthens the heart.—Horace.

We understand best that which brings in ourselves and by education brightens into birth.—Mary Baker Eddy.

Enlighten the people generally and tyranny and oppressions of both mind and body will vanish like evil spirits at the dawn of day.—Thomas Jefferson.

Real knowledge, in its progress, is the forerunner of liberality and enlightened toleration.—Lord Brougham.

More knowledge is comparatively worthless unless digested into practical wisdom and common sense as applied to the affairs of life.—Tryon Edwards.

Wisp of Wisdom: Often in a wooden house a golden room we find.

## HOME SERVICE

NO GARDEN TOO SMALL FOR A GAY LILY

## Tub Pools Are Inexpensive

How refreshing in a corner of your garden is a tub or pool. Time now to prepare for this summer's beautiful blossoms.

For the pool, just sink into the ground half a barrel, a tub or one of the rustic metal pools. Fill to within six inches of the top with soil.

Perfect for a small pool are the pigmy water lilies. Blooms come in white or yellow and you may have as many as a hundred from a single plant in one summer. For a truly delightful little water scene, combine lilies with other aquatic plants as our diagram shows: (1) arrowweed, (2) water lily, (3) water hyacinth, (4) shell flower.

Charming to edge the pool with weathered rocks, plant rock garden beauties such as marsh marigold, forget-me-nots, and the regal fern your tiny woodland is complete.

How to plant and propagate gorgeous water lilies? Our 32-page booklet has full instructions for growing every kind of water lily. Gives directions for pools made with cement and the stock and "gem" suggestion for water planting. Tells how to make and plant pools.

Send in coins for your copy of "How to Grow Water Lilies." Lily Pools" in Home Service Dept., Waukegan, N. W. 171, Chicago, Ill. 171. Send \$1.00 for your copy.

The following booklets are also available at 15 cents:

145—"Overcoming Nerves And Every-Day Health Problems"

161—"New Ideas in Making Curtains and Draperies"

## The National Anthem

Proper Respect Must Be Shown By Old And Young When It Is Played

The National Anthem must be taught in schools, its significance must be emphasized, and the proper behavior when it is played must become instinctive.

Canada is a nation, but her nationalhood exists within the Empire, and "God Save the King" is a prayer of as deep significance to the young Canadian as to the English lad, the Australian, the New Zealander, or the youth of any of the Dominions and colonies which also are within the Empire.

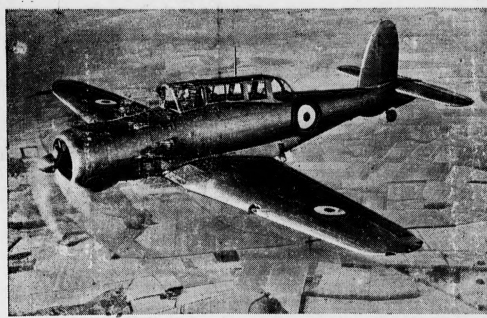

Not only the schools, but also parents have to play in this respect. They must set the example which their children will follow. The new Canadians must be taught a respect for the National Anthem without which they cannot be regarded as proper persons to enjoy the benefits of citizenship.—Georgie Mercury.

Russia is reported to have lost from 200,000 to 300,000 men in the war against Finland. To the Kremlin, however, human life is the cheapest of all commodities.

The "Roaring Forties" is a term used by sailors to designate the area of the southern oceans lying between 40 and 50 degrees S, where strong westerly gales prevail.

In the "Valley of Ten Thousand Smokes," Alaska, the sun is fried over high temperature furnaces, and steam pressure lifts the skillet into the air.

British Dive Bombers. The Blackburn Skua, dive bomber and fighter of the British Fleet Air Arm.

### LIST OF SOLDIERS ENLISTED FROM THIS DISTRICT

This list of men who have enlisted from the town and district will be published occasionally. The reason of this list is to keep a record of those who enlist. Take a look at it and if there is anyone that you know who has been omitted let us know at once so that their names may be added.

## WHEN YOU REGISTER YOU GET THIS CERTIFICATE

National Registration is a plan to mobilize and direct our human resources—to assist Canada in the present crisis. When you register you will receive a certificate, convenient for card case or pocket—tangible evidence that you have complied with government regulations. It is not only a record for the Government, it is also for your protection. As such, you will be required to carry this card with you at all times. Its presentation can be demanded at any time by the proper authorities.

**EVERYONE CAN HELP**—To keep the cost of this registration at a minimum the Government is asking the co-operation of all public-minded citizens in the work of registration. You can help by getting in touch with your local registration officials and offering your services.

### WHERE TO REGISTER

Registration offices are being set up by electoral districts in the same manner as in the last Dominion election. Registrars are required to register in the regular polling subdivisions of their own constituencies. But should a registrator be in some other province or district out of the regular polling subdivision on Registration Days, he or she may register at any registration office convenient, upon satisfactory explanation to the local deputy registrar.

**Penalty for Non-Registration**—Failure to register will make any male or female, married or single, over the age of 16 years, liable to a fine not exceeding Two hundred dollars, or to imprisonment for a term not exceeding Three months, or to both, and moreover to a further penalty not exceeding Ten dollars for each day, after the day upon which he should have registered, during which he shall continue to be unregistered.

Published under the authority of HON. JAMES G. GARDINER  
Minister of National War Services

### Town & District

Monday Mr. and Mrs. Don Bond left for their holidays.

Mrs. Benny of Calgary spent a few days visiting Mrs. W. P. Evans.

Mrs. Moore has returned home from her visit to Kamack, Sask., where she spent several weeks visiting her son.

Mr. and Mrs. N. A. Biddell and family left last week for Crowfoot Creek where they will go into the farming business.

The local boys band combined with the Strathmore band Sunday to play for the Strathmore Legion picnic in Calgary. The boys arrived home about 2 Monday morning stating they had had a whale of a time.

Bert Boos has resigned his position with the Shoptite Stores and has a vacation leave to take up a position similar to that which he had here.

All existing surplus will be needed sooner or later, Hon. J. G. Gardiner, minister of national war services and of agriculture, told the House of Commons in a recent review of progress. Saying that the new bacon and pork agreements would be worked out between Canada and the United Kingdom some time this month, the minister added there was no reason why Canada should not fill in the need of Britain for foodstuffs.

A botched job is usually one done in a hurry, by a cut-rate printer, who was not able to submit a proof to the buyer of printing. The price which the job was done necessitated quick work and the minimum of attention to detail. Result: The customer uses the printed matter, much against his will, and possibly to his detriment as far as his customers are concerned, all because the printing was done by a printer at a distance, and the job was not checked before printing. Insist on proofs. Your home printer will always gladly submit proofs for all work so that it may be carefully checked for errors and altered for improvement if deemed advisable, while any desired additions or deductions may be freely made. This results in a satisfactory job of printing, and, please all concerned, see that at your printing bears the imprint of your local printer—Gleichen Call.

### ENGAGEMENT ANNOUNCED

Mr. and Mrs. David McBean of Gleichen announce the engagement of their daughter Margaret Lois, to Mr. Newton O. Gillespie, son of Mrs. Gillespie of Calgary and the late Duncan Gillespie. Wedding to take place August 17, North Hill United Church.

### MEASUREMENT OF THRESHED GRAIN

The problem of providing storage for this year's crop raises the question of the space required for any given quantity of threshed grain.

A bushel of threshed grain occupies 1 1/4 cubic feet. To determine the amount of grain which any building will hold, find the length, width and height in feet. Next multiply the length by the width by the height, which gives the number of cubic feet. Multiply this figure by decimal eight (8) and the result is the number of bushels which may be placed in the bin. Thus a bin 12 feet long, 10 feet wide and 8 feet high is 12x10x8 = 960 cubic feet. 960 cubic feet will hold 960 x .8 bushels or 768 bushels.

If it is necessary to build a granary to hold a given quantity of grain the calculations are reversed. Since a bushel of grain occupies 1 1/4 cubic feet, 1,000 bushels would occupy 1,250 cubic feet and so on. If one divides the number of cubic feet occupied by a given quantity of grain by the height one wishes to build the bin, the floor area is obtained. Thus 1,000 bushels in a bin 8 feet high would need a floor area of about 156 square feet, or a floor about 12x13 feet in size.

### To Producers

Effective Saturday, August 10, a central grading station for eggs will be opened by Walter Hayes at the Pioneer Meat Market. Under the new set up producers can deliver their eggs to this grading station which will pay cash on daily market prices.

They will have an opportunity of seeing their product graded by a qualified grader who is in a position to point out to each producer weak and season of coming higher grades.

**ADOPT THEM**  
Adopt the use of Classified Want Ads. They have proved money makers for others. They are appreciated by the buyer, as they enable him to quickly locate the place where he can find his requirements. Will he find your business represented?
